

Cornerstone Partners

Cornerstone Partners Horticultural Services Company, Inc., established in 2006, offers horticultural, landscape and snow and ice management services to commercial and residential customers.

One of the most challenging issues in our industry is differentiating our services from other companies who market themselves as a full-service maintenance provider, but then fall short. We pride ourselves in providing unmatched attention to detail and continually exceeding our customer's expectations.

We also pride ourselves on our knowledge and expertise. Our site managers, maintenance teams, horticulturalists, and landscape designers are seasoned professionals who remain at the forefront of the industry through education and certifications. We implement the latest advancements while working within industry standards and guidelines. And each project is completed the same way it began; with impeccable attention to detail.

Our greatest recognition comes from within our industry. We are proud to have been honored recently with the following awards:

Business Ledger Business Excellence Award

In recognition of a company's business achievement, growth and community involvement.

Excellence in Landscape Silver Award from the Illinois Landscape Contractors Association – Commercial Landscape Construction category

In recognition of outstanding achievement in improving our environment.

Environmental Leadership Award from the Snow and Ice Management Association

Recognizes individuals who influence the adoption of best practices for efficient ice control operations in their business and demonstrate how they promote sustainable salting practices to the industry.

Snow and Ice Management Association's Excellence in Business Award

Presented to a company that demonstrates that it has excelled in business, operations and the community.
